Michael Okpara University of Agriculture, Umudike Abia State — *B.ENG. Computer Engineering*

November 2017- October 2023

PROJECTS

EdoSubeb — <https://www.edosubebims.com/>

This is an Inventory Management System I built using React and Laravel for the backend. This system enables the State Government (Edo State) to keep track of materials being distributed to all the schools in the State.

Authentic Alabama Fans —

<https://authenticalabamafans.com/>

This is an Auction E-Commerce website built with Wordpress CMS to enable the auction and sale of football jerseys and other materials to fans worldwide

Samantha Content Evaluator —

https://www.uxlivinglab.org/products/samanta_content_evaluator/

This is a SaaS platform used to detect if a certain text content is written by a human or AI.
