Summary

Results-driven Full-Stack Developer with proven experience building scalable web and mobile applications. Skilled in React, React Native, Laravel, and modern development workflows. Passionate about solving real-world problems through clean, efficient code and thoughtful UI/UX.

Professional Experience

Software Developer (NYSC) – Sidmach Technologies

Jul 2025 – Present

- Contributing to government and education-focused software systems.
- Collaborating with the engineering team to improve feature sets and fix bugs.

Mobile Developer Intern – Xanotech

2023

- Built and maintained mobile applications using React Native.
- Collaborated with UI/UX designers to implement intuitive interfaces.

Software Developer Intern – Petrong Digital Solutions

2022 – 2023

- Worked on web platforms and backend systems using Laravel and PHP.
- Helped automate business processes for client operations.

Contract Software Developer – Uniek Ideas Consulting

2023

- Built an inventory management system for EDOSUBEB using Laravel and React.
- Implemented role-based access, data analytics, and email notifications.

My Projects

EDOSUBEB Inventory Management System

Built for EDO State Universal Basic Education Board to manage inventory across 1200+ schools. Includes tracking, filtering, audit reporting, and role-based access control.

COMESO Mobile App

A healthcare voucher app built with React Native. Users can buy, redeem, and track vouchers while scheduling appointments with healthcare providers.

LUA Fitness App

Cross-platform fitness video platform with user workout tracking, reminders, and smooth playback via expo-video.

DeftPress

Multi-tenant website builder similar to WordPress, supporting custom domains, dynamic theming, billing, and isolated databases per tenant.

Skills

React, React Native, Laravel, PHP, JavaScript, TailwindCSS, MySQL, SQLite, Git, REST APIs, UI/UX Design, Responsive Design, Figma

Education

B.Eng. in Computer Engineering – Michael Okpara University of Agriculture, Umudike (Graduated 2024)
